Mr. Josquim here entered the room, but refused to accept the Chairman's seat.] The Acting Chairman, in proposing that the accounts be passed, said these had been before the shareholders for some time. He continued $-\mathbf{I}$ do not know that there is much information to be kiven you additional to that which you have in the report. The report, was made expeedingly full because we were aware that only very small number of the shareholders of this Company would attend the meeting. I need therefore only congratulate you on the good results which have been attained during the last half year. I think that is of some little

importance even to others than yourselves. has been hitherto a most unfortunate though projected and started in the Malay Peninsula have all done more or less bails; and I think it is a good sign for the whole Peninsula that this Company should be in such a good condition. That is the more so, because I do not think that any special skill or experience have been used in the management of this Company; and so it seems that with sufficient care and with ordinary shrewdness good results can be had from tin mining in Malaya. I move that the report and accounts be adopted. It is to be understood that the adoption

of the report will include the declaration of the lividend therein recommended-fifteen per cent for the half year, Mr. Sousr seconded the proposition, which was carried unanimously. Mr. NATHAN then proposed and Mr. PERTILE seconded that Mr. John Anderson by clooted as

Mr. Mary-I wish to make a proposal in view of the very able manner in which the Company has been conducted. I think that these in charge thereof-the in ctors and others-ire entitled to a little consideration at the hands of the shareholders, and I propose that some bonus be roted at this meeting I think they are worth it. Mr. Soust—I have much pleasure in secondng the proposal of Mr. Main. I think it must be plain to us that after paying a dividend of 22 per cent. in the year and carrying forward more than half of that which we paid for the concession, besides another \$8,000, it must be due to somebody that we have got such good results. No doubt partly this result is owing to very peculine circumstances. We have heard that they had not been able to ship their tin on account of the very bad state of the reads—as they would have shipped it in ordinary times. This at a time of ordinary circumstances would have proved a loss to the Company, loss of interest, may be loss on the market; but it has proved in this case a very

large profit. I believe it is partly owing to this detention that we have such substantial results before us. No doubt a great deal of the profits But it is not only to the market that we owe these good results but also to the good management; the Directors have had a difficult task before them and I think we ought to consider them. I propose that the fees for the past half-year be doubled. That is to say, I second Mr. dain's proposition, if he puts it in that way.

Mr. MAIN assented. The Actine Chairman-I understand the motion proposed by Mr. Main and seconded by Mr. Sohst to be that, for the past half-year, the Directors are to receive each \$100 a month, intead of fifty. That extra sum is a bonus and is to apply only to the past half-year.

The motion was carried unanimously. The Acting Chairman-Will you permit me on behalf of the Directors (although these thanks ought to be given by Mr. Josquim) to thank you very much for the cordial manner in which you have rewarded our work. I can honeatly say that we have done the very best we could for you, and have bestowed a very great deal of lanxiety and labour upon the affairs of the Company. I should perhaps supplement what has been said by two remarks. Mr. Sohst said-and quite accurately-that Mr. Duuman receives by his agreement a bonus upon the dividends declared, and he will receive that at once. Mr. Honey and Mr. Brett, the assistant-managers, will also probably receive a bonus, which the directors intend to vote them at their next meeting; we have simply refrained till after the general meeting. It may, perhaps, be advisable to say, touching this question of profits arising from the increasing value of tin during the time our ore was retained at Jelebu, (because of the bad state of the road), that while that profit is considerable it is not what you would call an absolutely gigantic item in the half-year. doubt whether the profits so obtained cou supposed to exceed \$10,000. I mention that because it should not be imagined that a very large part of our profits has arisen from an involuntary speculation in tia. A vote of thanks to the Directors and staff,
